

Series 2011

Scope of the List

The following list is intended to provide a bibliographic guide to all reports that have been deposited in the Canterbury Archaeological Trust library. The arrangement is by year date of compilation. Reports have been given an individual number within each year date. The reports can be found in magazine files in the library likewise arranged by year date and report number.

The following information is given for each report:

- 1 report number
- 2 location
- 3 type of development
- 4 type of archaeological intervention
- 5 national grid references
- 6 start and end dates of field/desk work
- 7 type of report
- 8 pagination and contents
- 9 name(s) of compiler
- 10 issuing institution
- 11 date of publication
- 12 site code
- 13 archive number
- 14 name of museum (Canterbury = CCM) and accession number

Note that the list includes all reports received, not only those compiled in-house. Reports produced by, for example, the Oxford Archaeological Unit (OAU), Museum of London Archaeology Service (MoLAS), Wessex Archaeology (WA), South-East Archaeology Service (SEAS) as well as other archaeological, historical and heritage organizations are included on the list. The relevant site codes and internal archive/report numbers of these reports have also been cited where known.

Other Sources

Reports produced by CAT have been routinely abstracted by the Archaeological Investigations Project (Bournemouth University). The abstracts are published in the Supplements to the CBA Bibliography, copies of which are in the library. These published finding aids also list reports by other archaeological, historical and heritage organizations working within Kent.

A number of reports are listed where the only available texts are those published in the CAT annual reports. These reports are marked with an asterisk against the title. Copies have not been duplicated in the library report series. Reference should be made to the relevant annual report.

Finding Reports

Use the normal search facility to find reports by location, name of author, year date, site code or archive number.

A number of reports listed are either in preparation or are in the process of being copied. These will be added to the library as soon as possible when this list will be updated.

Reports are routinely removed from the library and may not have been returned. Please would everyone co-operate in ensuring that reports are returned to the library promptly.

Adding Reports to the List

To enter a report onto the list, take the next number in the relevant year and enter up the basic details as above. Check first that the report has not previously been indexed. If in doubt do not use a new number.

Editing

Once a report has been entered onto the list, it is important to remember not to alter other entries in any form despite the obvious lack of data within some entries that is indicated by an asterisk. The objective is to provide consistent accurate information so please check before making any alterations.

Since November 2004 individual compilers of reports have taken over the task of entering onto the list details of reports as they are completed.
